ABOUT ME

I am an Interior Design graduate from BHC School of Design, having completed my Diploma in 2025. I am currently pursuing a Bachelor of Arts in Interior Design at BHC, further developing my skills and knowledge in Interior Design. I am gaining experience whilst still studying but am always open to any new opportunity. From a young age, I developed a deep passion for creative hobbies and an interest in interiors, which naturally led me to pursue a career in design. I am a hardworking, detail-oriented individual with a strong sense of organisation, always striving for excellence and perfection in every task I undertake. My helpful nature means I often put others before myself. While I am introverted and work well independently, I also enjoy working in team settings, where I am encouraged to push my boundaries and where collaboration brings out my creativity. I enjoy designing spaces that are functional, sustainable, and aesthetically pleasing. I am eager to continue developing my skills and contributing to projects that inspire, uplift, and serve the needs of others.
